

Звуки второй очереди — промпты для ElevenLabs

Раздел Sound Effects. Промпты на английском — так модель понимает точнее. Скачивать в WAV, называть файл ровно по id (как в таблицах). Тишину в начале и в конце, громкость и петли я доделываю сам, так что длительность можно ставить с небольшим запасом.

Как генерировать

- **Duration** — ставить вручную, как в столбце «Сек». Авто-длительность часто даёт лишний хвост.
- **Prompt influence** — 0.6–0.7 для всего, кроме голосов и акцентов (там 0.4–0.5, чтобы было живее).
- **Loop** — включать только там, где написано «петля».
- ElevenLabs даёт 4 варианта за раз. Где нужно 3 варианта — берите три лучших из одной генерации и называйте `_1`, `_2`, `_3` (например `step_grass_1.wav`). Игра сама выбирает случайный, чтобы звук не приёдался.
- В каждый промпт уже вписан хвост **dry, close, no music, no background** — он отрезает музыку и лишний фон. Если звук всё равно выходит с музыкой или эхом — добавьте в конец **isolated sound effect**.

Шаги — по 3 варианта на поверхность

Один шаг в файле, не походка. Если выходит несколько шагов — добавьте **only one step**.
